TRANSPORTATION TO GO ON CASH BASIS TOMORROW

How carriers in this region will put into effect on August 1, the government's ruling that all transportation charges thereafter shall be on a cash basis is explained in a statement issued by W. F. Ingram, assistant treasurer of the Southern Pacific company. The statement covers points that have been agreed upon also by the Santa Fe, Western Pacific and Ogden railroads.

According to Ingram's statement the new rules will not apply to transportation rendered to the United States government; its allies; the various states; counties and municipalities; the District of Columbia and Alaska; the American Red Cross. Special arrangements for the payment of such charges can be made on the approval of the assistant treasurer of the carrier.

Agents have been instructed to immediately notify all patrons now having bonds on file that present arrangements will be cancelled as of July 31, 1918, and all outstanding bills, including those issued in the month of July, must be paid on or before that date.

All present arrangements covering a remittance of freight bills to other agencies, banks or accounting department for collection will be discontinued tomorrow.

Shippers maintaining branch houses or agencies in one or more cities or towns on line of carrier must either arrange for cash payment of charges locally accrued or authorize their representatives to make sight drafts on the main office with freight bills attached, or authorize local railroad agents to make such drafts. Such shippers or consignees should file with agents at their main office location credit bond in amounts sufficient to cover credit to be extended at all branch agencies, accompanied by letter specifying location of their branches at which applicable.

Branch houses receiving prepaid freight which may be insufficiently prepaid on original waybills, should secure authority from their main office to make draft for any under charge carried on such shipments when received, freight bills giving full data to be attached. This procedure is established to eliminate loss of time and expense to all concerned in corresponding over small items. Checks of well known responsible parties will be accepted in payment of charges due carrier.

All freight bills must be paid as rendered, claims being presented for any alleged errors. It is expected that early adjustment of such claims will be arranged for. The general rule of collecting transportation charges at time of delivery, or prepaid charges if obtained will still obtain but well known responsible parties may be considered on cash basis provided that bills presented immediately shall be paid not later than the following day.

In order to avoid congestion in handling numerous shipments and especially at terminal points a credit, when approved by the assistant treasurer can be extended for a period not exceeding forty-eight hours after the time allowed patrons to make payment on a cash basis, on condition that a sufficient surety bond is filed. This practically makes settlements on a semi-weekly basis when covered by a bond. Quick attention is necessary on the part of agents and shippers in securing and filing bonds that no inconvenience may be experienced.

TAKES PRISON PHOTOS AND IS ARRESTED

SALT LAKE, July 26.—Detected in the act of taking photographs of the prison compound at Fort Douglas, Joseph Barnett, living near St. George, was arrested yesterday afternoon by the military authorities. He was turned over to George G. Birdsell of the bureau of investigation of the department of justice, who brought him to Salt Lake and placed him in the county jail, where he will be held pending investigation.

Barnett is subject to the selective draft and protested when arrested that he had no ulterior motive in taking the pictures. He said that he had just come to Salt Lake and had taken pictures of prominent places in the city, and, visiting Fort Douglas, thought to take pictures of the prison compound as an interesting feature.

The film including the pictures of the prison compound was confiscated by the military authorities at the fort and the camera was returned.

POOR JUDGMENT.

The Sunday school teacher was explaining to the children how Sunday came to be instituted.

"The Lord worked for six days," she said, "and rested on the seventh day. Therefore, the Lord blessed the seventh day and hallowed it. Now, has any child any question to ask?" Willie put up his hand.

"William wishes to ask a question. What is it, Willie?"

"Why did the Lord pick such a dead day as Sunday for a holiday?" asked Willie.

The teacher couldn't explain.—San Francisco Argonaut.

WESTERN FRONT AS IT APPEARS TODAY

The above map shows the general battle line on the western front. The portion of the line between Soissons (1) and Rheims (2) is where the allies' great counter offensive is being staged. It is believed one object of the counter blow is to shorten the line between the two points and relieve the pressure on Rheims.

HERE'S ONE WAY TO ECONOMIZE

Eden Electric Washing Machine Will Save Money for the Housewife every week.

An economy expert has figured that during the course of a year the average housewife pours down the drain from \$50 to \$150 through the medium of waste in the washboard. This loss, it is figured, is the result of injudicious, and, perhaps, uncontrollable use of "elbow-grease."

The Eden electric washing and wringing machine is said to be a remedy for this waste, as the machine is designed specifically with a view to eliminating the excess rubbing, which destroys fabric wearing qualities and sends garments into the discard long before their period of usefulness should be at an end.

Claims that the Eden laundry appliance embodies all the latest wrinkles in washing machines are supported by innumerable arguments set forth by J. L. White, western sales manager for the Brokaw-Eden Manufacturing company, of Alton, Ill., which company recently selected the Ogden Electric Supply company of 2439 Washington avenue as its distributing agency for this district. Mr. White is in charge of an intensive sales campaign for the Eden, the campaign to continue through the present month.

The machine is constructed entirely of metal and the patentees have paid special attention to the electric motor which provides the propelling force for the machine. This is equipped with an automatic safety release, which instantly disconnects and stops if overloaded, and prevents injury to machine or operator. This is said to be an exclusive feature of the Eden. Hinged cylinder doors are also said to be an exclusive feature. All moving parts are covered, and an automatic stop lever causes the cylinder to come to a standstill in correct position for opening the doors.

In fact the machine is a wonderful new invention solving the clean clothes problem in the home, which must be seen to be appreciated.—Advertisement.

IDAHO MAN INVENTS FLUID POWER MOTOR

SALT LAKE, July 26.—Declaring that it is 96 per cent efficient and that it will, therefore, revolutionize the mechanical world of power and locomotion, once its merits are known, M. A. Fatten from Idaho Falls is exhibiting in Salt Lake City his new invention that he calls the fluid motor. According to the inventor, it may be operated by the application of steam, water or gas. It is destined to supplant the screw propeller of the biggest ocean-going vessels, and to take the place of the most highly perfected motor used in aircraft, he believes.

The mechanism consists of a revolving sphere in a fixed steam-tight casing. The motor fluid is admitted through the outer casing into a small compartment between that and the revolving sphere, which is held in such a position on its axis that there is a single line of contact with the outside wall. The cylinder is forced in a continuous direction, thus eliminating, according to the inventor, the waste that is unavoidable in the reciprocating engine. He has a standing offer of \$5 for the person that will demonstrate that the reciprocating engine has more than 32 per cent efficiency and that his motor has less than 96 per cent.

One of the peculiar advantages of the Fatten motor is its alleged freedom from a "dead center." It is said that it can be set in motion by the application of seven-eighths of a pound of steam. Mr. Fatten is confident that he has a revolutionary invention, and he expresses a desire to have an opportunity to demonstrate its efficiency to the most skeptical.

LITTLE GIRL HIT BY AUTOMOBILE

Annie Gilbert, daughter of Ambrose E. Gilbert of 325 Healy avenue, was struck by an automobile driven by Hyrum Watkins last evening at about 8 o'clock, on Washington avenue, between Thirty-second and Thirty-third streets and sustained bruises and minor injuries to her back and legs.

The little girl had been playing on the sidewalk but is said to have run into the road directly in front of the approaching auto. The driver sounded his horn and was going at a slow rate of speed. Eye witnesses of the accident said he was not to blame.

After being struck, the child was taken to the office of Dr. W. R. Emmett where her injuries received attention. Later she was conveyed home where she was reported resting easily.

EXAMINATIONS OF THE REGISTRANTS

Reports on physical examination of five Ogden city registrants yesterday were as follows:

J. Leslie Higginbotham, general service; Merrill B. Bryan, limited service; Jesse Perry Chambers, Paul Wright and Yoo Hee will be examined again in sixty days.

LEAVES FOR CAMP LEWIS.

POCATELLO, Idaho, July 25.—Dr. A. M. Newton, who recently received his commission as captain in the medical reserve corps, left today for Camp Lewis. Dr. Newton until recently was a captain in D company, Idaho national guard, and was ranking medical officer of the state troops. He was also a member of the district exemption board for southern Idaho. Dr. Newton has been located in this city for over six years, and the many friends and acquaintances he made joined in an informal farewell party at his home on Wednesday evening.

LENINE REVIEWS RUSS SITUATION

United Action of All Workers of the World Necessary to Bring Victory.

AMSTERDAM, July 26.—Premier Lenin, in a speech at Moscow before the government conference of factory committees, said the position of the soviet republic had become extremely acute in view of the international complications, counter-revolutionary conspiracies and the food crisis, according to a Moscow dispatch received by way of Berlin.

The Russian protectorate knew very well, Lenin told the conference that the united action of the workers of the entire world was an essential condition to the victory of the Russian revolution. It was easy for Russia to begin a revolution but extraordinarily difficult to continue and conclude it. On the other hand, the beginning of a revolution in such a long organized bourgeois country as Germany was extremely difficult, but then it would be so much easier to carry it to completion.

Referring to the Brest-Litovsk treaty, Lenin said that according to the treaty Russia must pay Germany 6,000,000,000 rubles. The attempt of the Social-Revolutionists of the Left to entangle Russia in a war with Germany by the murder of the German ambassador was no way to evade the treaty. The way out must be found by

the joint exertions of the proletariat and the poor peasants.

Grand Dukes Carried Off
AMSTERDAM, July 26.—A dispatch from Moscow to the Cologne Volks Zeitung says that an unidentified band recently broke into the residence of the former Grand Dukes Igor, Constantine and Ivan Constantinovich and Serge Michaelovitch and carried them off.

Tennis Tournay Next Month to Decide Five Championships

NEW YORK, July 25.—Five national tennis championships were named on the program for the thirty-eighth annual tournament at Forest Hills next month. The list was announced today by J. C. Myrick, vice president of the National association.

The singles championship for men, open to rated and qualified players, will begin August 26. The boys' and juniors' singles, open to winners of center titles, will begin August 28. The veteran singles, competitors in advance of 45 years of age, begins August 26. The father and son doubles from the tournament are to be used for providing athletic equipment for the army and navy.

The entry for the championships will close August 16.
